

Anuhya Vusirikala (Anu) - London, United Kingdom

Application for Head of Scientific Meetings

I am a senior trauma and orthopaedic resident on the Royal National Orthopaedic Hospital, Stanmore rotation training programme in London (UK). I have a keen interest in hand and wrist surgery.

I would like to apply for the position of Head of Scientific Meetings on the YEHS Committee.

During my residency, I have developed extensive experience in organising educational events and meetings. I developed strong leadership and organisational skills. I have successfully organised and managed multiple academic events ranging from small workshops to large national educational programmes.

Every year I organise a workshop for medical students taking them through the common conditions in orthopaedic surgery which includes patient assessment and also saw bone workshops to perform common orthopaedic procedures such as distal radius fixation. I have set up a 10 week interview series for candidates applying for Orthopaedic residency in the UK with 120 participants attending each week. I have set up a national teaching programme for senior orthopaedic residents who are sitting the Fellowship of Royal College of Surgeons (FRCS) exams. As the current trauma and orthopaedic trainee president of my residency programme, I have organised the annual academic meeting.

During these events I have successfully led a team and coordinated aspects of event planning including venue selection, logistics, programme development, speaker coordination and attendee management.

These experiences have given me the ability to lead and motivate a team to achieve our goal and foster a collaborative and productive work environment. I have delivered these events in a timely manner and within the allocated budget. I have developed excellent communication skills with colleagues, speakers, and event organisers. I have a keen eye for detail, and I am able to identify and foresee any potential issues and develop strategies/ solutions to ensure smooth running of the event.

I am eager to contribute to the YEHS committee, and their successful organisation at scientific events. I hope my skills and experience make me a strong fit for this role.
